

ProviMEN™

Tablets

PROVIMEN tablets are designed to restore lost energy, which we lost in our daily life (age factor). It supports male endocrine system, particularly for reproductive health, boost's athletic performance and endurance. Ingredients presented in PROVIMEN, help to prevent Nitric Oxide deficiency and make blood circulation efficient, relive general fatigue, improves mood and reduces stress level. PROVIMEN contribute to quality optimization of seminal fluid which supports sperm quality, quantity and maintain its motility & morphology which is a key factor in the conception process. PROVIMEN Tablets hasn't any kind of chemical and hormones, instead of that PROVIMEN consist on totally natural ingredients which not only help to restore lost energy but also help to activate internal normal endocrine system to work the way they were made to and also enhance sexual urge boost energy refresh mode and give pleasure along with mental satisfaction.

INGREDIENTS:

Serving of three tablets provides:

L-carnitine	500 mg
L-arginine	500 mg
N-acetyl L-cysteine	80 mg
Pine bark ext	100 mg
CoQ10	15 mg
Folic acid	800 mcg
Beta carotene	3 mg
Vitamin C	200 mg
Vitamin D	10 mcg
Vitamin E	120 mg
Zinc	40 mg
Selenium	60 mcg

INDICATIONS (HEALTH CONDITIONS):

Athletic performance & endurance Enhancer, supports blood circulation, rejuvenate reproductive system, natural fertility booster, reduces stress level.

L-carnitine is an amino acid that produced in the body and supplement too, L-carnitine plays a significant role in body which involves mitochondrial function and energy production. In cells, it helps transport fatty acids into the mitochondria, where they can be burned for energy, which has key task in prevention of disease and healthy aging.

Research illustrates the potential benefits of carnitine's, for various conditions, including heart and brain functionalities, muscles movements and in both seminal plasma and sperm cells, as Spermatozoa utilize energy on motility, which is primarily in the form of intracellular ATP generated by oxidation of substrates, fructose, glucose, sorbitol, lactate, or pyruvate plays an important role in sperm maturation and its potential for motility.

L-arginine is another amino acid also produces by body and supplemented have action as a vasodilator (opening & dilating blood vessels) help to improves blood flow to the genital area by dilating blood vessels that eradicate the physical caused erectile dysfunction. It also helps in stimulates the release of growth hormone and to increase the libido, improves immune function, support to control high blood pressure, Peripheral arterial disease (PAD), might decrease symptoms of angina. Additionally, if supplemented improve blood flow, heal wounds faster, alleviate anxiety, treat burns, may improve kidney function for people with congestive heart failure, can enhances exercise performance.

N-acetyl-L-cysteine regulates the amount of glutamate in the brain. This is the key compound related to a healthy metabolism and cellular energy. It helps to fights against cellular oxidative damage it Improves sperm quality.

Pine bark extract is a good antioxidant and destroys harmful free radicals. It provides an increase in endurance performance. It has a direct effect in stimulating nitric oxide (NO) production in endothelial cells in the body which line the smooth muscle of the male reproductive organs and supports stronger erections. It acts to lower blood pressure, having a positive effect on cardiovascular health.

Coenzyme Q10 acts as an antioxidant that has an important role in forming the membranes and other structures within cells by fighting the effects of oxidative stress; Oxidative stress from free radicals can weaken sperm, causing damage and slow down motility. CoQ10 may improve sperm motility, which is the sperm's ability to swim by combating

ProviMENTM

Tablets

Folic acid help regulate the healthy homocysteine levels in the body without enough folic acid in the body, homocysteine levels can increase and influence cardiovascular disease. It also contributes to the quality of the semen. Folic Acid is necessary for DNA synthesis. Low levels of folic acid have been associated with a decreased sperm count and decreased sperm motility. Researchers say the combination of zinc and folic acid results in a 75% increase in total normal sperm count in sub-fertile men.

Beta carotene helps to regulate the genes of body's immune response. It has antioxidant properties that neutralize free radicals in the body that cause tissue and cellular damage.

Vitamin C is an antioxidant present in seminal plasma. Acid citric is a key intermediate among the major ways of producing the energy used by sperm and other tissues of the body.

Vitamin D3 plays an important role in promoting muscle strength and integrity. Optimal levels of this nutrient are necessary to support male fertility and to maintain a healthy sperm count and high quality semen.

Vitamin E helps to reduce the damage to the sperm cells caused by free radicals. For stronger swimmers, vitamin E supplement can help protect and promote better-quality sperm, according to research published in the International Journal of General Medicine. Nearly 700 infertile men took vitamin E every day for at least 100 days. Over 50 percent of the men had improvements in sperm motility and form, and roughly 11 percent of men were able to get their partner pregnant.

Zinc is an essential trace mineral that plays a role in sperm formation, testosterone metabolism, and cell motility. Zinc supplementation has been shown to increase testosterone levels, sperm count, and sperm motility.

Selenium supplements have been shown to increase

sperm motility, the combination of selenium with vitamin E has been shown to decrease damage from free radicals and improve sperm motility in infertile men that helps moving the sperm to the ovum for fertilization.

Precautionary: If you have known hypersensitivity to any ingredient of PROVIMEN, do not use this product. Chronic Kidney Diseases (CKD), liver and heart patients should use this medicine after consulting with their physician. Do not exceed the recommended daily dosage. Food supplements are not intended to be used as a substitute for a varied diet.

Storage: Keep out of reach of children. Store in a dry place, away from direct sunlight below 30 °C and do not freeze.

Presentation: Fifteen tablets in one blister and two blisters with a leaflet in a box.

Dosage: One or two servings a day or as prescribed by the physician.
